## Graduate Placement Report

Academic Year 1977-78

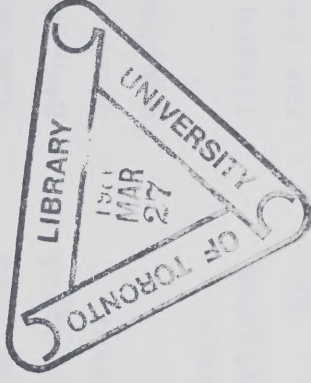

GRADUATE PLACEMENT REPORT  
(Academic Year 1977-78)

CA226N  
DG  
-G 66

COLLEGES OF APPLIED ARTS AND TECHNOLOGY

This report has been prepared jointly by the Ministry of Colleges and Universities (now Ministry of Education) and the Career Planning and Placement staff of Ontario's twenty-two colleges of applied arts and technology.

Hon. Bette Stephenson, M.D., Minister  
Dr. H.K. Fisher, Deputy Minister

The 1978 graduating classes entered the tightest job market with the highest unemployment rate since the 1930s. Despite these conditions, the job-finding success of the community college graduates remains high.

Indications are that this strong demand for CAAT-trained personnel will stretch at least into the 1990s.

This report portrays, statistically, the job placement experience of last year's graduates of the post-secondary programs at Ontario's twenty-two colleges of applied arts and technology. It shows the total number of graduates in each program and the number who found full-time, program-related employment. It also shows median salaries and the number of students who are proceeding to further education.

This information is intended to assist high-school counsellors and students or others who are considering enrolment at an Ontario community college. These statistics are a compilation of data from all of the colleges and do not necessarily reflect local or regional

employment patterns. They are current as of November 15, 1978.

Detailed information about your area can be obtained from the placement officials at your area's college. They are listed on page 4 of this report.

Section one of the report (pages 5 to 18) provides data about graduates of programs which are offered in English. Section two (pages 19 to 23) provides similar data about programs which are offered bilingually in English and French or in French only.

The overall summary of all programs at all twenty-two colleges on page 24 shows the following rate of placement success for those graduates who were available for employment:

- one year programs 85 per cent
- two year programs 84 per cent
- three year programs 90 per cent.

Of the 2,062 students seeking work, 30 per cent have been successful in securing part-time employment while awaiting full-time employment.

It is also important to note that of the 824 students not seeking work, 30 per cent are students who have secured part-time employment and are not seeking any type of full-time work.

Naturally, some programs are in higher demand than others. A very strong demand continues for all of the business and technology programs with the need far outstripping the supply in all careers in the manufacturing field. Some of the Behavioural Science (Applied Arts) and Health programs are heavily dependent upon the three levels of government for employment. With all governments becoming increasingly constraint-conscious, there has been a weakening job market, but an increasing acceptance of geographic mobility has provided many opportunities in other provinces and the USA.

Each college has personnel and programs to assist students in their career planning and job search strategies. It is their responsibility also to keep in tune with the changing demands of the employment market in your area. As mentioned above these people are listed on page three of this report. They will welcome your call if you wish more specific information about your local college or the labour market generally.

Programs are arranged alphabetically within divisions regardless of duration.

The following notes will be useful to readers:

NUMBER OF COLLEGES: is the total number of colleges reporting graduates from a particular program.

AVAILABLE FOR WORK: includes TOTAL WORKING in UNRELATED and RELATED JOBS as well as those who are SEEKING WORK.

TOTAL WORKING: is the total of those graduates employed in both UNRELATED and RELATED JOBS.

UNRELATED JOB: employment which, in the opinion of the college, bears little obvious relation to the graduate's program of study at the college.

RELATED JOB: employment which, in the opinion of the college is clearly related to the graduate's program of study at the college.

MEDIAN SALARY: is a middle salary range of students in jobs related to the program of study at the colleges. For example, if there are 19 graduates whose salary ranges are reported, this figure will reflect the salary range of the tenth graduate from either end of the pay scale. Figures are expressed in thousands of dollars annually (\$000).

NUMBER OF SALARIES REPORTED: includes the total number of graduates who reported salaries in jobs directly related to the program of study at the colleges.

STILL SEEKING WORK: graduates who, on November 15, 1978, had not found and kept employment.

NOT SEEKING FULL TIME WORK: includes graduates who, on November 15, 1978, were working part-time and were not seeking full-time work, visa students who are ineligible to work in Canada, and graduates who, for personal reasons are not interested in seeking full-time work.
